

BUILDINGS FOR OIL & GAS

BUILDINGS FOR OIL & GAS is the commercial project division of **Future Buildings** and **TORO Steel Buildings** – a convenient, one-stop source for any prefabricated steel building or roofing system.

Future Buildings and TORO Steel combined their areas of expertise to form this unique supplier for oil and gas clients and their service companies offering the benefits of structural solutions in either the ARCH STYLE or the STRAIGHT WALL FORMAT.

Our teams can engineer and manufacture any style steel building – for any project- in any size- to ship anywhere in the world.

The following images demonstrate some of the features and benefits of our steel buildings and examples of their applications within the oil & gas sector.
